COELEM CLAMPS

OUR MISSION

- Honesty and reliability,
- Teamwork and human investment,
- Compliance with international quality standards,
- Consciously and meticulously respecting the environment,
- Compliance with customer requests, keeping satisfaction at the forefront,
- Maintain the delicate balance between profitability and customer focus

OUR VISION

- To be an exemplary organization with competitive power in the clamp sector in the domestic and foreign markets,
- To reach a wide consumer group by developing our technology beyond customer expectations,
- To achieve the best with continuous improvement practice,
- To be a pioneer in change by developing innovative products on a sectoral basis,
- To diversify our products continuously,
- To ensure the continuity of our contribution to the economy,
- To make our employees functional with continuous training and practices.

ABOUT US

OEM CLAMPS (İdeal Otomotiv İnşaat Kelepçe San. ve Tic. Ltd. Sti.) has been operating in the fasteners sector since 1990. Our global brand OEM CLAMPS, registered in 2010, has been serving in more than 30 different sectors.

OEM Clamps serves to automotive, commercial vehicles, agricultural and construction machinery, filtering and irrigation systems, maritime, aviation, heavy construction machinery and many sectors. Our products are used in a wide range from exhaust and emission systems(DPF, SCR, SCRT, DOC), turbo, intercooler, hose and pipe connections.

OEM Clamp products include rubber hoses, plastic pipes, solid objects; It is used wherever steel pipe, flanged joints or other parts need to be fixed, joined or securely connected.

More than 70% of our products are exported to worldwide well-known OE brands.

Our company is advancing as a reliable partner in the sector with its experienced staff, the principle of continuous new product development, world-class product quality, competitive price policy and customer satisfaction.

OUR QUALITY, ENVIRONMENT AND OHS POLICY

In order to respond to the quality, safety, reliability, environment and other product demands and expectations of our customers and the international community;

To continuously increase, develop and determine customer needs and expectations and satisfaction and to meet their demands at the highest possible level,

To be respectful to the environment in the processes it carries out,

To produce products that comply with the legal requirements and standards of the national and international markets where we sell our products,

By making the best use of its resources, investigating and eliminating the root causes of our mistakes, reduce wastage and losses, and by observing all the factors affecting our costs, to bring them to the minimum level possible,

By following the innovations in the clamps and fasteners sector, to continuously improve our quality management system, products and processes, to take its place in the world market as a leading company in our sector;

It has adopted it as a quality policy and committed to implementing it.

HUMAN RESOURCES POLICY

In line with the principle of sustainability, our priority values are adherence to ethical principles, transparency, zero tolerance to bribery and corruption in our relations with relevant parties in all our Quality Management System and business processes.

Our employees must act with integrity and honesty in their relations with all our stakeholders. It is our human resources policy to make an effort to work with the awareness that the job imposes a responsibility towards people, the environment, the law and its customers.

THE OEM CLAMPS APPROACH

OEM CLAMPS serves to the industry in order to meet the customer demands from beginning of the R&D to the product delivery as a principle.

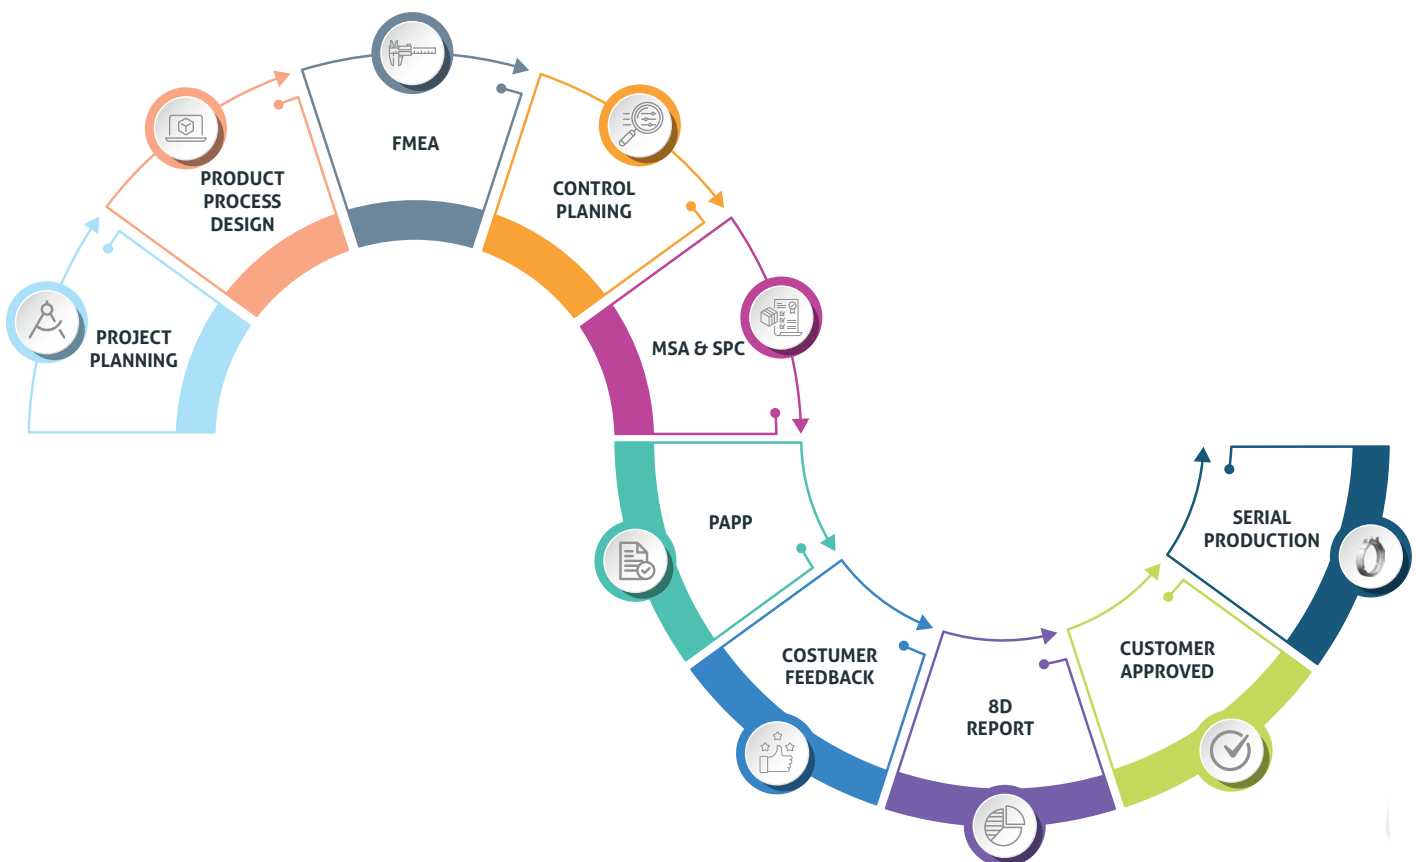

Continuous improvement and zero-defect policy applies in each production process with modern production line and experienced production team.

Oem clamps offers fast and safe solutions with its customer-based and solution-oriented approach.

Major advantages of OEM Clamps;

- New product development by constantly meeting the customer demands
- With decades of experience in the clamping industry, In-house designed and manufactured molds, production lines and custom product range
- Quality policy followed in all processes from design to finished product

Our quality planning that we apply in all;

QUALITY CERTIFICATIONS

The OEM Clamps is honoured with being registered and operate our Quality Management Systems under ISO 9001, IATF16949, ISO 14001 and ISO 45001 certifications. Certification standards provides our customers the confidence that OEM Clamps leads by a culture of quality and continuous improvement, while operating in an environmentally responsible manner.

*All current Quality Certifications can be found on our website, www.oemclamps.com

V-BAND CLAMPS - VTB

OEM V band Clamps are used on all flanged and V-shaped connection points in many different areas. OEM V Band Clamps, which are produced considering the intended use and environmental conditions (lock types, mounting type and speed, heat, pressure, vibration, corrosion resistance, mechanical strength, etc.), meet customer special requests with a product range of more than 200 apart from existing products, From design to mass production, we are always ready to advise and serve our customers for special applications and their requests with our many years of experience in the industry.

V-BAND CLAMPS - VBK

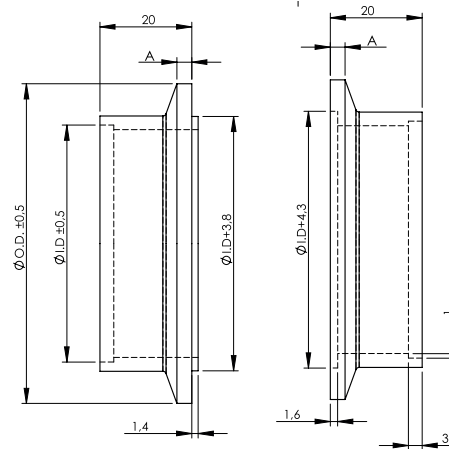

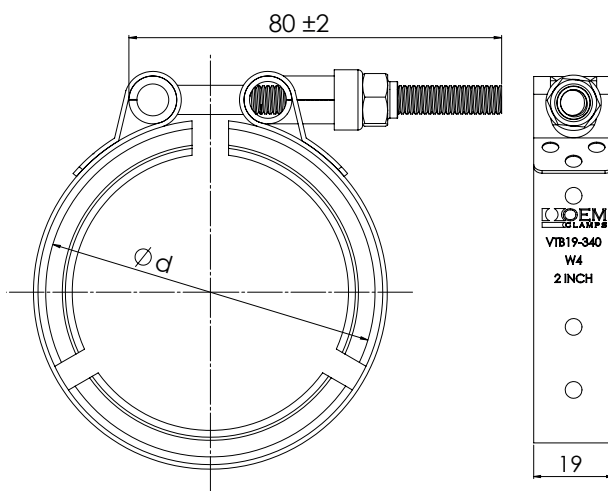

OEM V-Band Flange Kit provide fast, secure coupling for tube connections. It is a perfect solution for easy installation and disassemble of tube connections.

It is used in a wide range of applications including turbo charges, tube fixing, pumps, high pressure air and water systems.

DOUBLE V-BAND CLAMPS - DVB

OEM Double V-Band clamps provide high tightening torque and secure coupling for critical joints which includes large diameter applications and high vibration.

- High tightening torque and accurate sealing with double lock system
- High resistance to pressure and vibration
- Long term durability, strength and corrosion resistance
- Space and weight saving compact design
- Easy handling
- Quick assembly

It is used in a wide range of applications including exhaust connections, pumps, ship exhaust systems and other flanged joints.

V-BAND CLAMPS -VBC

OEM V-Band clamps provide fast, secure coupling for flanged joints.

OEM V-Band clamps are easy usage with the highest quality standards.

- Engineered for long term durability, corrosion resistance
- Space and weight saving compact design
- Durable and stronger closure system
- Temperature rating up to 900 °C
- Easy handling
- Quick assembly

Outline Specification Options

- Diameter range 55mm to 600mm
- **Materials:**

300 series stainless steel : 304, 301, 316, 316Ti

400 series stainless steel : 430, 409, 430Ti, 441

Custom Designs

OEM Clamps can make also custom products as per your request. Custom products could include specified dimensions, different band and hardware materials, different bandwidths, different bolt types and varied lock systems.

Areas Of Usage

It is used in a wide range of applications including exhaust systems, turbochargers, pumps, filters, emission and industrial applications, diesel engines and other flanged joints.

STANDART T-BOLT HOSE CLAMPS - TB

OEM T-Bolt clamps are designed for points that require accurate sealing. They are well suitable for medium and heavy-duty applications.

- High tensile strength and sealing
- Resistant to temperature changes and corrosion
- Uniform clamping force throughout 360 degrees
- Space and weight saving durable desing with three welding points
- Sizing: 35mm - 224mm(other sizes can be offered)
- 400 and 300 stainless steel series material options(other materials can be offered)
- Quick and easy assembly

It is used in commercial vehicles for coolant and air-intake systems, automative industry, marine industry, building machines, agriculturle machines, irrigation systems, Pump and Filters, heavy construction machinery industries as well as the hose industry.

SPRING LOADED T-BOLT HOSE CLAMPS - YTB

OEM Spring-Loaded T-Bolt clamps provides constant band tension for medium and high pressure joints. Changes in hose diameter caused by heat, pressure and vibration are absorbed by the spring and provide a safer connection. HYTB model is designed for heavy-duty applications.

- High tensile strength and sealing
- Resistant to temperature changes and corrosion
- Uniform clamping force throughout 360 degrees
- Space and weight saving durable desing with three welding points
- Sizing: 54mm - 224mm(other sizes can be offered)
- 400 and 300 stainless steel series material options(other materials can be offered)
- Quick and easy assembly

It is used in the automotive, marine industry, building machines, agriculturel machines, irrigation systems, Pump and Filters, heavy construction machinery industries as well as the hose industry.

HEAVY DUTY HOSE CLAMPS - AI

OEM Heavy Duty Clamps are designed for high tightening torque and accurate sealing for high pressure joints.

- High band tension and tightening torque
- Durable and compact design
- Sizing : 17mm - 252mm (other sizes can be offered)
- W1, W2, W4 and W5 options
- Quick and easy assembly

It is used in commercial vehicles, irrigation systems, building machinery, Pump and Filters, heavy construction machinery, food industries, power generators and as well as the hose industry

DOUBLE HEAVY DUTY HOSE CLAMPS - DAI

OEM Double Heavy Duty Clamps provide high tightening torque and accurate sealing for high pressure joints. They are suitable for applications with hi-torque clamping requirements.

- Durable double lock closure system
- Large clamping range
- Higher band tension and accurate sealing
- Sizing: 59mm - 345mm (other sizes can be offered)
- W1, W2, W4 and W5 options

It is used in irrigation systems, building machinery, Pump and Filters, food industry, heavy construction machinery industries as well as the hose industry.

OEM Narrow Type heavy duty clamps (14mm) have been designed as an alternative to the worm drive clamps and provide accurate sealing with easy assembling. Advantages over the worm drive clamps; provides more robust band tension and prevents scraping on clamp. The only disadvantage is their low clamping tolerance.

This product has utility model certificate by TPE (Turkish Patent Institute).

- High band tension and sealing
- Resistant to temperature changes and corrosion
- Sizing: 16mm-224mm(other sizes can be offered)
- Space and weight saving design
- Easy handling
- Quick assembly

It is used in automotive, marine industry, irrigation systems, Pump and Filters, heavy construction machinery and wherever the worm drive clamp used in hose industry.

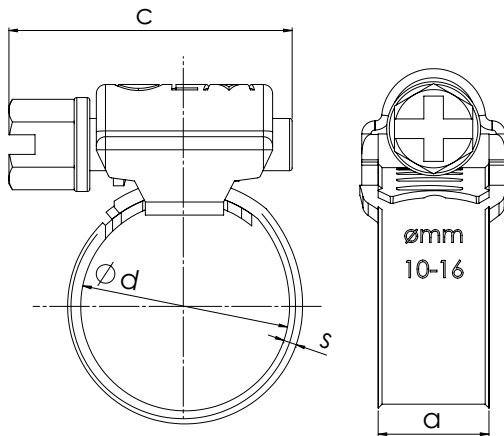

WORM DRIVE HOSE CLAMP - AK

With the mechanical locking system and steel band material, the product's physical properties provide the torque values required by the world standards. The rounded edges prevent to damage the hose. The clamps are produced as 8,5 and 10mm bandwidths. It is used in automotive industry, marine industry, irrigation systems, white appliances and hose industry.

OEM Worm Drive Clamps are produced as proper to DIN 3017.

- Band width: 8,5-10mm
- Durable and stronger one piece designed mechanical locking system
- The rounded band edges to prevent damage to the hose
- Space and weight saving design
- Quick and easy assembly

DPF CLAMPS

OEM DPF Clamps are designed to operate cleaning diesel particulate filters easier and manufactured with the tolerances OEM specifications to redound effectiveness of vehicle's filtration system. OEM DPF Clamps exceeds emission standarts and provide reliable performance for particulate filter canisters. OEM Clamps will serve as a set with a wide range of DPF kits(filter clamps and gaskets) in the near future.

OEM Clamps make custom products as per your request.
Customers specify bandwidth, lath styles, material type/sizes and hardware.

- Resistant to temperature changes and corrosion
- Space and weight saving durable design
- Quick and easy assembly

STRAPS

OEM Clamps Strap assemblies are frequently used for commercial applications like gas or liquid tanks, pipes etc. OEM straps are used to tie down or secure fastening equipment to walls, and interior and exterior surface of vehicles. OEM Clamps make custom products as per your request.
Customers specify bandwidth, lath styles, material type/sizes and hardware.

- Resistant to temperture chages and corrosion
- Space and weight saving durable desing
- Quick and easy assembly

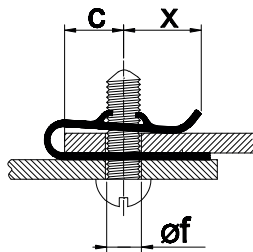

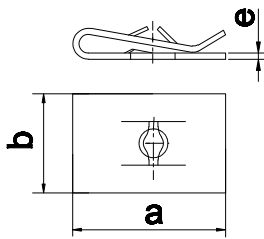

BATTERY TERMINALS - KB

These are mainly used for connecting batteries in auto industry and Inverter batteries. We take due care that terminal are not rough and don't have any sharp edges, to make sure the wires are not damaged while installing. The terminals used for batteries has two different type as "+" and "-"

CLIPS - IK

OEM Sheet Clips provide serial mounting facilities for secure fixing. OEM Clips are used for fixing purposes in automotive , air-conditioning, white appliances etc. industries.

WE EXPORT OUR PRODUCTS MORE THAN
75% TO GLOBAL FIRMS

OEM Clamps continues to produce millions of clamps over decades of production and export to more than 40 countries. With the pride of being the main and sub-supplier, especially for OE brands, and its investments, product range and production numbers increasing every year, it is taking firm steps towards its goals by strengthening its position in the clamp industry.
